

CST 130

STRETCH WRAPPER

CST 130

TURNTABLE STRETCH WRAPPER

The CST 130 is a turntable stretch wrapper that is ergonomically very suitable as a substitute for manual wrapping, which is often heavy and labour-intensive. This is because of the user-friendly control panel and the low costs.

The CST 130 has a Ø1650 mm turntable and is equipped with a photocell that automatically detects the height of the load, allowing the operator to focus on other tasks. A major benefit of the stretch wrapper is that film can be pre-stretched up to 150%, by an electric pre-stretch system. This system reduces the amount of film used per wrapped pallet and allows you to save on costs.

6 wrapping programs can be saved with the user friendly control panel, so that these programmes can be applied quickly. The stretch wrapping machine has 3 working methods: up and down, wrapping with a topsheet, and only up. This allows pallets to be wrapped according to your requirements. The wrapper is very robust and low-maintenance because the machine is constructed with fewer wear parts. Only a belt is used to move the film trolley, instead of chains, wheels and gears.

Benefits

- Robust and easy to use
- Ergonomic use
- 6 wrapping programs

Options:

- Ramp (for pallet jack or forklift)
- Maximum load of 2000 kg
- Maximum wrapping height of 2500 mm
- Photocell for dark loads
- Additional options on request

Technical data:

Turntable	Ø1650 mm
Maximum wrapping height	2200 mm
Rotation speed	3 to 12 rpm
Maximum load	1200 kg
Maximum pallet size	1000 x 1200 mm
Height turntable	75 mm
Stretch wrapper	Electric pre-stretch system
	Pre-stretch manually adjustable
	Equipped with a photocell for height detection
Film	500 mm width, core 76 mm
Power supply	230 V, 1PH + N + PE, 0,75 KW
