STRAPPING  
WRAPPING  
CODING  
TAPING

The CST 140 is a turntable stretch wrapper. The machine is ergonomically very suitable as a substitute for manual wrapping, which is often heavy and strenuous.

The CST 140 has a Ø1650 mm turntable and is equipped with a photocell that automatically detects the height of the load and the film is pre-stretched (up to 250%) by a motorised pre-stretch system. This system reduces the amount of film used per wrapped pallet and this allows you to save on costs and contribute to a sustainable production line.

The user friendly control panel allows you to store up to 9 wrapping programs to apply different wrapping methods quickly. The wrapper is very robust and low-maintenance because the machine is constructed with fewer wear parts. Only a belt is used to move the film trolley, instead of chains, wheels and gears.

**Benefits**

- Pre-stretch up to 250%
- User-friendly and ergonomic control panel
- 9 wrapping programs
- Also useful for small production

**Options**

- Ramp (for pallet jack or forklift)
- Maximum load of 2000 kg
- Maximum wrapping height of 2500 mm
- Photocell for dark loads
- Roping
- Horseshoe
- Additional options on request

**Technical data:**

Turntable	Ø1650 mm
Maximum wrapping height	2200 mm
Rotation speed	Maximum 12 rpm
Maximum load	1200 kg
Maximum pallet size	1000 x 1200 mm
Height turntable	75 mm
Stretch wrapper	Motorised pre-stretch system
	Pre-stretch manually adjustable
	Equipped with a photocell for height detection
Film	500 mm width, core 76 mm
Power supply	230 V, 1PH + N + PE, 1 KW
